RTO MANAGEMENT SYSTEM

Problem Description

1) Scope:

The purpose of the RTO management system is to provide a leading technological tool for the ease of rto function such as registration of vehicles,issuing different types of license(learners license,permanent license,two wheeler,three wheeler,gear,without gear,etc), issuing certificate to assert the fitness of the vehicle,issuing number plates etc. This project is very useful for those who are concerned with the different processes or RTO.
